

Reuben-GLAM Seminar:

The sense of nature

23rd June 2021, 5-6pm
at the Oxford Botanic Garden

Living organisms have evolved a suite of structural and functional adaptations that enable them to cope with environmental stress. How can we learn from these to inspire new approaches to interdisciplinary research and generate innovative solutions to future challenges?

Join us for an exciting tour of the Oxford Botanic Garden's plant collections, with:

- **Emily Flashman**, Senior Research Fellow, Department of Chemistry, and Reuben College
- **Chris Thorogood**, Deputy Director and Head of Science at the Oxford Botanic Garden

Registration required. Details at: <https://reuben.ox.ac.uk>
